

Cubase 7.0.2 Complete Installer

The Cubase 7.0.2 Complete Installer contains all data necessary for a complete offline installation and embraces, among others, the following files:

- Cubase 7
- Padshop
- Retrologue
- Eucon Adapter 6.5
- Drum Loop Expansion 01
- Midi Loop Library
- Upload Manager
- HALionSonic SE
- Groove Agent ONE Content
- Loopmash Content
- Reverence Content

Download

Due to the effective compression the installer is packed within a RAR file. If you don't have an unwrapper installed that can handle RAR files you can, for example, use one of these:

Windows: 7-Zip - <http://7-zip.org/download.html>

Mac: UnRARX - <http://unrarx.com>

Since Safari doesn't handle RAR files correctly I recommend using another browser - for example Firefox - to download the file.

Installation Windows

Download the "Cubase_7_Installer_win.rar".

Extract the RAR archive into a folder. The following files will be extracted:

- Cubase_7_Installer_win.part1.exe
- Cubase_7_Installer_win.part2.rar
- Cubase_7_Installer_win.part3.rar

Double click "Cubase_7_Installer_win.part1.exe" to start the installation.

Installation Mac

Download the "Cubase_7_Installer_mac.rar".

Extract the RAR archive into a folder. The following files will be extracted:

- Cubase_7_Installer_mac.part1.dmg
- Cubase_7_Installer_mac.part2.dmgpart
- Cubase_7_Installer_mac.part3.dmgpart

Double click "Cubase_7_Installer_mac.part1.dmg" to start the installation.
