

Version History / Issues & Solutions

Nuendo 4.3.0

The following issues have been fixed in version 4.3.0:

Issue ID	Description		
24306	Improved / changed behaviour of soloed or muted tracks in folder		
24305	Improved / changed behaviour of various solo or mute status of tracks regarding automation		
24304	Improved / changed behaviour of various copy / paste functions for soloed or muted tracks		
23891	Improved stability of Network collaboration.		
23720	Improved stability for malformed iXML data.		
24044	Fixed: Offline Process History does not work after copying project to another computer		
14439	Fixed: "Save to new project" fails if a Video track is in the project.		
20390	Fixed: QuickTime videos at 29.97df are truncated.		
23325	Fixed: QuickTime fullscreen mode on multi-display setups results in bad picture quality.		
20545	Fixed: Crash when Nuendo is set to timecode 60 FPS but recieves 25 FPS.		
21186	Fixed: Day wrap in 29.97df showed a gap.		
23305	Fixed: After importing some OMF files the required audio files are missing.		
22782	Fixed: Crash when importing BWAV files created with Cantar.		
23338	Fixed: Crashes with certain Macros and the audio editor.		
24302	Fixed: Occasionally Nuendo became unresponsive (freeze) when switching between projects or changing the routing if Direct-Monitoring was active.		
21734	Fixed: Occasional crashes during frequent punch in/punch out operations		
23261	Fixed: Occasional crashes when Auto Save option was enabled with certain projects		
19393	Fixed: Importing via X-Send is missing		
22475	Fixed: Automation read was inaccurate when using Virgin Territory.		
22237	Fixed: Delete overlaps function does not delete all overlapping regions		
22846	Fixed: Project window will scroll to the top after adding a marker in split track mode		
21242	Fixed: Suspend Autoscroll and preference "locate when clicking in empty space" resulted in unexpected behaviour		
23326	Fixed: Logical Editor functions "Linear Change in Loop" and "Relative Change in Loop" do not work with tracks in "Linear Time" mode.		
21090	Fixed: Occassionally changing the control name for the Generic Remote did not work.		
23445	Fixed: Some VST2 plug ins crash in surround formats 7.0 or higher.		

Nuendo 4.2.2

The following issues have been fixed in version 4.2.2:

Issue ID	Description	
21171	Improvement: Scan process of MPEG2 video files now has a status bar	
19123	Improvement: Metronome click can be routed to VST Instrument in VST rack now	
19676	Improvement: Marker window now has switchable Auto scroll button	
17832	Improvement: AutoScroll function now has switchable "Suspend"-mode	
18885	Improvement: Automatic scrolling of Arrange area when setting locators has been improved	
20947	Improved Open Project window: Default shows Nuendo projects	
20983	Improved file compatibility exchanging projects between Mac PPC and Mac Intel platform	

20543	Improved performance and reliability when recording a large number of tracks simultaneously		
11225	Fixed AAF: Nuendo can't load AAF from Avid Express		
18389	Fixed AAF: Intendo can't load AAF from Avid Express Fixed AAF: Import of referenced AAF from Avid Xpress Pro 5.7		
19170	Fixed AAF: Exported AAF from AVID systems can't be opened in Nuendo		
19681	Fixed AAF: Crash on importing AAF		
19919	Fixed AAF: Media files of referenced AAF files will not be found (automatically).		
20310	Fixed OMF: Import window and buttons too small for German text translation		
19851	Fixed OMF: Import loses clips - wrong OMF project start time		
19337	Fixed OMF: If exported to a full disc, now a warning appears instead of beach ball (Mac OS X)		
20308	Fixed OMF: Export window and buttons too small for text display		
20884	Fixed OMF: Cut fade outs after re-import of OMF file to application		
20066	Fixed: Silence added to beginning of exported audio.		
19979	Fixed: Video from Prunus (Real-time HD Editing System) cannot be played in Nuendo		
19846	Fixed: Video frames are not matching Nuendo Time Display		
19360	Fixed: Under certain conditions MP3 Export creates files with wrong sample rate		
20025	Fixed: The "Follow Tempo" tag is ignored when audio files are imported, tagged with "Drum/Percussion" attribute		
19615	Fixed: Set Record Folder to a different location forces "Image under construction" on reloading the project		
19891	Fixed: Range selection is rejected when creating a new track		
20175	Fixed: Project Logical Editor does not select inside Cycle if tracks are set to linear time base		
20584	Fixed: Plug-ins not in compliance with VST 2.3 or higher may crash the VST Plug-in Manager when unloading them		
19632	Fixed: Mono assignment in Mixconvert/Control Room corrected to centre speaker		
19960	Fixed: ModMachine doesn't correctly restore settings		
19660	Fixed: Linked channels are not in focus with each other and don't behave linked		
20156	Fixed: Key Editor is missing the "Indicate Transposition" button		
19844	Fixed: Input position no longer jumps inconsistently to seconds and/or minutes		
18994	Fixed: Full screen does not work correctly with DirectX and DirectShow Player on PC Windows Vista systems		
20260	Fixed: Frozen tracks using an External Instrument allowed MIDI parts to be editable		
20185	Fixed: Frozen tracks are not played back anymore when toggling between two or more projects		
19413	Fixed: Direct Monitoring doesn't work in right channel of Stereo Busses		
18702	Fixed: Crash may occur when MOTU ASIO Device is switched off during operation		
20218	Fixed: Crash may occur when changing VST Connections using MOTU interfaces		
20234	Fixed: Crash may occur when audio events are transposed		
19942	Fixed: Crash may occur freezing Virtual Instruments in large projects		
19488	Fixed: Compatibility issue with exported DTS files		
20257	Fixed: Bounce Selection produces an error when bouncing very small audio events		
19150	Fixed: Audio Export is missing MP3-ID tags		
18918	Fixed: "Unfinished File Recovery" does not work		
19361	Fixed various Snap point positioning problems		
21040	Fixed Sample Editor: Flatten edits with MPEX or Real-time Algorithm leads to predictable results now		
20440	Fixed QuickTime Video Player: MPEG2 *.mpg file could not be imported		
20942	Fixed Post Filter: EQ curve was not updated when the filter frequencies are adjusted via remote controller		
21001	Fixed Post Finter. EQ curve was not updated when the finter frequencies are adjusted via remote controller Fixed MixerDelay: Wrong Solo behaviour with modifier		
19768	Fixed MixerDelay: Presets created by user cannot get loaded		
20189	Fixed Mixer Delay. Presets created by user cannot get loaded Fixed Mixer Delay. Presets created by user cannot get loaded		
21181	Fixed mixconvert Control Room. Using fold down via key commands doesn't remember settings		
20851	Fixed corrupted chunks in (acid) wave files which no longer crash the application		
21007	Fixed an issue working with 29.97 Non drop frames and Virtual Katy		
20390	Fixed an issue with truncated 29.97 QT video files after import		
21068	Fixed an issue with Preset management in Mixconvert (Control Room)		
20874	Fixed an issue with Preset management in Mixconvert (Control Room) Fixed an issue with NTSC video positioning when using System Link		
20394	Fixed an issue with MIDI Timecode if Project offset is < 00:00:00:00 and CYCLE = ON		
20034	Trace an issue with which three de in troper, order to 2000/00/00 and CTOLE = ON		

21136	Fixed an issue with Matrix Encoder channel management error	
19171	Fixed an issue setting time code from cursor	
17573	Fixed a problem with leading zeros in Audio Export window	
21005	Fixed a crash when changing data in List Editor	
21134	Fixed a crash after import of SMF then switching/closing a project	
19557	Fixed a compatibility issue importing certain Broadcast Wave files	
20142	(NEK) Fixed: Crash may occur when printing notation	
19920	(NEK) Fixed: Crash may occur when opening Score Editor (Mac OS X Leopard only)	
12114	(NEK) Fixed Score: Printing at massive magnification	
21162	(NEK) Fixed Score Printing: Empty page no longer printed when printing a range of 2 or more pages	
20994	(NEK) Fixed a display issue with Page Layout mode in Score Editor	

Nuendo 4.1.3

The following issues have been fixed in version 4.1.3 (Hot fix):

Issue ID	Description
20209	Fixed: Crash may occur when freezing tracks
20187	Fixed: Notes are dropped under certain conditions
19942	Fixed: Crash may occur when exporting (audio mixdown)

Nuendo 4.1.2

The following issues have been fixed in version 4.1.2:

Issue ID	Description	
10704	[AAF] import from Nuendo 4 to Avid or Nuendo 3 was off by 2 frames.	
11583	Undo "delete automation track" is now possible.	
12598	Spector sometimes produced hanging notes.	
17386	[Network Collaboration] Using a Common file folder on a server didn't always work.	
17479	Regions disappeared from project window after time-stretching.	
17885	"Soundminer" database functions were incompatible.	
17890	Score: Favourites were not remembered.	
17928	Sample Rate conversion was too slow.	
18333	After loading certain projects, Audio I/O didn't work (until audio device was reset).	
18377	Score: "hide measures" didn't work correctly in some cases.	
18486	Score: Display Transpose for GM Trackpresets failed.	
18557	Score: MusicXML Export: double barlines were not exported.	
18635	Video: Changing output device to Blackmagic Decklink caused a crash on some Macs.	
18773	Score: Ghost note tie at page break	
18780	Large Projects with a high number of plugins caused sluggish GUI (despite moderate CPU load).	
18789	Score: Moving Triplet brackets didn't work correctly.	
18790	Score: Moving bar numbers didn't work correctly.	
18793	Score: Ties were faulty at page break.	
18879	[WK Audio ID]: "STOP" button had to be hit two times to deactivate the shuttle wheel mode.	
18901	[MediaBay] [Tags] Tagging of a high amount of REX2 Files massively increased the system RAM consumption.	
18902	Some REX files couldn't be imported from Media Bay to Project.	
18952	NEK4 Installer 2byte character problem	

18996	Crash after key command for "Plug-in Editors Always on Top" was used.		
19011	Slicing in Sample-Editor did not work with audio files longer or shorter than a full bar		
19022	Toontrack EZ-Player crashed when loaded as VSTi in the VST-Rack.		
19027	Warped Clips got out of sync after the "straighten up" flag had been toggled ON / OFF in the pool.		
19054	Score: Crosshair cursor didn't always work.		
19056	Score: Dynamic signs One up /One down were faulty.		
19057	Score: Undo didn't work on "flip" cresc arrow.		
19069	"Align Event" functions weren't working properly. (if N3 prefs are being read).		
19084	[WK Audio ID]: paging on extension didn't work.		
19089	Score: Marker Dialog was the same as Staff Name.		
19090	Score: Automatic colouring of verses is now switchable.		
19093	Score: Undo History: Stems were "Necklen"		
19121	Score: "Auto scroll" caused scrollbars to move and therefore "disable" itself		
19124	Control room Mixconvert, default settings have been revised.		
19142	Transpose / Info Line: Multiple selected events did not retain their relationship.		
19159	Very short events in audio part editor could cause an error message / crash.		
19167	"Solo" algorithm for transpose was not recalled correctly after a Sequel project was imported.		
19191	Mixconvert Control Room: mono / stereo problem.		
19192	automation - Trim Mode changes entire mix (persistence problem)		
19210	Mono2Stereo - Delay: Some parameters weren't restored correctly.		
19257	Score: Auto layout sometimes crashed.		
19268	[MediaBay] [Filter] apostrophes broke the category search.		
19289	Preference "Link Channel & Sends routing panner" didn't always work.		
19328	[MediaBay] [UserTags] Yes/No tags were not working.		
19336	"Solo" on Mixer Delay didn't work.		
19338	Surround Panner wasn't available anymore as regular plugin.		
19349	Some MP3 files could not be imported.		
19352	Export Audio Mixdown via Tracks or Groups could cause a crash.		
19358	Inserts did not retain channel names.		
19366	"show used" on the automation panel: the focus of the display jumped away from the highlighted track		
19367	Nuendo Automation: Preview / Suspend problem (values were not restored correctly).		
19374	Surround Projects from Nuendo 3.x opened with reset surround panners in Nuendo 4.		
19386	[OMF] Export from Nuendo 4 to Avid didn't work right.		
19399	Export Mixdown sometimes resulted in files of wrong bit-depth.		
19401	Writing / reading automation could cause system hang / CPU overload in certain cases.		
19409	Some plugins caused clicking noises at event start / end points.		
19444	Inserting events from the Media Bay into project automatically set the track to musical mode.		
19475	Apple Remote didn't work on Mac OS X 10.5 aka Leopard		
19481	StudioEQ - on/off status was not restored correctly.		
19494	DeEsser Plugin: In some cases it scaled too large or too small.		
19495	Some audio files seemed to contain click noises when they were imported.		
19498	[Video] - Possible Crash when the QuickTime window was dragged across the screen during playback.		
19524	Some user interface fonts were corrupted on Mac OS 10.5 (Leopard).		
19540	Score: Wrong "Undo" was displayed after dragging notes had been dragged with the mouse.		
19581	Score: Deleting time signatures didn't work correctly.		
19592	HALion One content was defective when program was installed on Mac OS 10.5 (Leopard)		
19599	Text entry of "Length" field in Info Line was erratic.		
19634	[MediaBay] [Tags] - Tagging Multiple files didn't work under certain conditions.		
19653	Instrument tracks in a folder track did not un-mute when the parent folder was un-muted.		
19694	Control Room Bus Activation Buttons didn't work when a track was in solo.		

19701	Record-enabled linked channels do not engage record on all of them	
19759	Some WMA files imports failed (e.g. from Olympus LS-10).	
19770	MixerDelay. Channel routing doesn't work correctly	
19773	[Dolby Digital Encoder and DTS Encoder] no GUI will be displayed + crash	
19788	SOLO on parent folder tracks didn't SOLO tracks in sub folders.	

Nuendo 4 – Issues and Solutions

The following table describes issues you may encounter using this software as well as possible workarounds.

24276Exporting Audio is not responsive for a long period of time.If the project contains a complex tempo track the audio export will take a long time. Please be period.24246windows only: Renaming liles in the Mediabay windows can result in crash.Do not use Copy/Pate from another application, e.g. Notepad, period take a long time. 	20773	VST performance meter peaks on Apple laptops.	Set "Line in" is set as input source in Core Audio Device

		Settings.
20741	When multiple events are being offline-processed at once, only the first clip will get the set process parameter values, all others will be processed by the default values.	At first, process 1 event with the desired settings. (These settings will be used as "defaults" later). Then select the rest of the events and process them.
20725	Program crashes when MusicXML is exported.	Switch to Page Mode first.
20585	Rapidly stepping through VST plugins or VST Instruments preset lists while the Media Bay scanning is in progress may cause a program crash.	It's recommended to wait until the Media Bay scanning is complete.
20545	Crash when Nuendo is set to timecode 60 FPS but receives 25 FPS.	If Nuendo comes up with the message "time code has changed", do not click "accept".
20396	Open TL files from Tascam MX 2424 are not read correctly when they contain virtual tracks.	The application "EDLtranslate" can be used to adapt these OpenTL files.
20376	CC121 controller: Automatic configuration doesn't work if Nuendo was launched before the CC121 was turned on (or plugged in).	Turn on and plug in the CC121 only after Nuendo was launched.
20370	CC121 controller: Nuendo works sluggish if the CC121 was unplugged and replugged while Nuendo is running.	Do not unplug the CC121 during Nuendo operation.
20203	(Mac) MIDI In-Place Editor local toolbar (click on little triangle) cannot be closed anymore and blocks any other operation.	Close the local toolbar by pressing the "RETURN" key.
19901	Timewarp editing operations with a massive amount of MIDI data may cause an unexpected increase of RAM consumption.	Lower the maximum undo count in the preferences.
19674	Automated VST2 plugins do not automatically update their parameter value display (e.g. knobs or sliders) when another song position is located in STOP mode. Also true for the Surround Panner.	Actually the parameters are set correctly, only the graphics do not update. On playback, the parameters will display their values correctly.
19657	Automatic Tempo Recognition doesn't work. That may lead to unusable results i.e. at Hitpoints "Close and Slice" . Wrong Event Tempo and wrong Event Length!	At definition Tab initialize the Bar-Length of the original file and watch the outcome of the calculated tempo.
19379	The Mix Convert plugin setting are reset it to default if the plugin is being dragged to another channel.	After dragging the Mix Convert to another channel, please manually set the desired settings or load the specific preset.
19340	Track Quick Control settings which were saved with a track preset do not restore correctly when the track preset is applied to another track.	Go to the Sound Browser, find the Track Preset you saved and double click it to create a new midi track. Then the Track Quick Control settings show up correctly.
19325	Multichannel Interleaved files are not compatible with all other applications (e.g. Dolby Tools).	Use the option "Don't use Extensible wave format" in the Audio Export Mixdown window.
19299	On the "Mixconverter", BYPASS has no effect.	Use ON / OFF instead.
19130	C++ Runtime Error message on program launch (0n Windows Vista 64 bit).	This message is harmless and can be ignored.
19122	If the application is set to background while a plugin is in the process of loading it's sample content, it might crash.	Wait until the plugins have completed the loading process.
19096	If Selection Tool and Range Tool are toggled and used on a track that is currently recording, a crash might occur.	Avoid using the editing tools on tracks that are currently recording.
19082	On some PPC plugins running on a Mac Intel via VSTBridge, text entry might not be possible.	If no native Mac Intel versions of the plugins are available and you need to enter e.g. serial numbers, start the application in "Rosetta" mode and enter the settings. After that is done, start the application without Rosetta again.
19049	GM Drum Maps are not available after loading a Sequel project.	 Create a new project with a MIDI track Open a GM Drum Map and save it. load your Sequel project and load the previously saved GM Map.
	Madia Davida and a sector and a sector sector and the sector sector and the sector secto	Choose only drives that contain audio content to be scanned.
19047	Media Bay scanning operating system volumes might crash.	Choose only arres that contain addio content to be scattled.

	parameter values are set).	Time = minimum / Room Size = maximum value.
18992	Surround Panners are being reset when channels settings are copy / pasted to other channels.	Manually re-adjust the panning after you have copied channel settings.
18728	MMC Track Arming state is not remembered after machine was set "offline" once.	Check Track Arming status on the machine if you have set it OFFLINE for a while.
18690	Copy / Paste between projects doesn't work right with Folder parts (they end up at 00:00:00:00 instead of their origin position.	Unpack audio events from their folders before copying them to another project.
18561	In some cases, depending on the ASIO buffer size, the MIDI Plugin "Step Designer" may cause monophonic instruments to play unintended "Glides".	Put MIDI Plugin "TrackFX" after the Step Designer and set "length compression" e.g. to 20/21.
18525	Media Bay stops scanning (hangs) when there are corrupted media files (mainly video) in the folder.	Please make sure there are no corrupted files in the folders you scan.
18502	Factory Loops from Sequel play out of sync in projects which are not in 44.1 kHz sample rate.	To use Sequel Loops in non-44,1 kHz projects, proceed as follows: 1. "Save project to new folder" 2. Select all Loops in the Pool and uncheck "Straighten Up". 3. Use "Conform Files" from the Media menu. 4. Select all Loops in the Pool and enable "Straighten Up" again.
18482	Projects and exported tracks from Nuendo 4 cannot be loaded in Nuendo 3.	For exchanging audio with Nuendo 3 users, use OMF, AAF or AES31 instead.
18458	For some reason the Guitar Symbols at Score Editor/Settings/Project/GuitarLib. are missing, although present in Sequencer-folder.	Copy GuitarLib.xml manually from: C:\Program Files\Steinberg\Nuendo 4\Presets to C:\Program Files\Steinberg\Nuendo 4
18398	The visible note range in parts for Drum Tracks is only A0 - D#5.	For using the Drum Editor, do not use notes outside this range.
18314	Dragging plugins from stereo to mono channels may cause problems (missing channels, garbled sound)	If possible, reinstantiate the plugin rather than dragging between stereo / mono channels.
18224	Long waiting time before Audio Export Mixdown starts to render ("not responding"). Happens with projects that carry a large number of Tempo Changes. In some cases this may take several minutes.	Please wait until the Audio Export begins.
18160	Crackling during playback and unsatisfying performance on 8 Core CPU computers.	8 core CPU's currently shouldn't be used at very small buffer sizes. Please increase the ASIO buffer size.
18003	When plugins are dragged between insert slots while "Constrain Delay Compensation" is turned ON, problems with the plugins might occur. This applies to plugins that introduce a delay, such as e.g. UAD.	Turn "Constrain Delay Compensation" OFF before dragging plugins between insert slots.
17916	5.0 AIFF file causes error message on Import "Sorry, this input configuration is unknown or not supported". This is because AIFF files do not write the channel configuration to the file.	Export Files with other Channel-widths than mono or stereo as Broadcast Wav or import AIFF files as split channels.
17721	In lane mode, if a part under another part is muted, all un-muted audio above that part is silenced as well.	Switch Preference "Treat muted events like deleted" off.
17392	QuadraFuzz, Multiband Compressor and maybe some others will crash on Intel Macs after closing their editors.	Use native alternatives.
17349	Calculated Slices are related to the whole audio file. This may lead to mismatch to the project after slice and close.	Bounce Selection before calculating Hitpoints, slice and close.
17218	Some Cinepak encoded QuickTime videos crash Nuendo.	This is a bug in the current version of QuickTime (7.2 and before). Apple is informed about it and should fix this in an update to QuickTime.
16968	The selection command "Select in Loop" does not select folder track	Close folder tracks before using selection commands.

16904	Adjustments made on a remote controller affect real-time audio	Don't make adjustments on the remote controller during real-time
16898	mixdown. Possible incompatibility with GRM Tools dongle, might cause Blue	audio mixdown. Get GRM Tools dongle driver update.
16893	Screen when plugins are initialized. Tracks with monitor on (manual) are not included in export audio mixdown.	Turn input monitoring OFF before exporting.
16876	[Mac only] Tempo Browser: copy/paste function doesn't work for multiple Time Signature Events.	Time Signature Events have to be copied individually.
16871	Time Stretch Tool does not work on very short clips.	Bounce longer clips before time stretching.
16827	Long recordings with AIFF, WAV, BWAV and SDII, which exceed the largest possible recording file supported by these file formats, will result in damaged recorded files.	If you consider making recordings with a duration longer than 4 hours in mono or longer than 1 hour in 5.1, select the WAV64 file format for recording in the project settings.
16675	Deactivating a "DirectMusic MIDI In" port results in complete loss of all "DirectMusic Midi In" ports.	Activating any "Direct Music In" cures the situation.
16674	Adding a very high number of tracks (audio or MIDI) at once can cause temporary unresponsiveness of the program.	Add less tracks at once, e.g. groups of 20 tracks each.
16672	If audio offline process is opened by a command from a remote, Preview doesn't work.	Use a regular key command instead to open offline process.
16671	MIDI panning in the inspector doesn't work with A1 VSTi. Regardless of panning movements to left, right etc. the sound from A1 comes from the centre all the time.	Use audio output panning instead.
15630	Very small audio fades (only a few samples long) may cause clicks.	Increase audio fade length.
15625	MPEX Time stretch (Offline Processing): If portions of a clip are stretched, sometimes there are audible artefacts occurring at the end of the stretched range. Sounds like parts of the processed clips are repeated.	The stretched part must be manually trimmed afterwards so that the "repeating" sound isn't audible anymore.
15203	Audio Recording might fail if individual track recording folders were used and the record disk (e.g. Firewire Device) has been removed.	Re-assign track record folder before continuing recording.
15102	Wrong MTC is sent If Preroll is used and you START from 00:00:00:00 using 29.97 fps	Set projects with NTSC frame rate to a project start time of 00:00:00:00.
14790	Video for Windows or QuickTime video player are not able to play back Windows Media Video files.	Choose DirectShow Video player in Device Setup to play back Windows Media Video files.
14538	Waves plugins crashes in Nuendo 4.	Waveshell 5.0.3 is required for Nuendo 4.
14442	While plug-ins Double delay or Mod Delay are in front, Nuendo may crash if the arrow keys are used (Mac OS X only)	Close these plug-ins or switch to project window before using the arrow keys.
14346	Media Bay Scope Window cannot display the Waveforms of SDII audio files.	If you need to work with files that are still in SDII format, please consider converting them to AIFF to make them compatible with the MediaBay.
14283	Nuendo does not show installed Rewire devices on Mac PPC computers.	Install the last Rewire Library. This should be installed with last versions of Rewire devices like actual Reason version.
14252	In previous version of Nuendo, Halion2 has been automatically replaced by a Halion3 during loading a project. This does not work in Nuendo 4.	Save your old projects with Halion3 assigned before loading them into Nuendo 4.
14096	Some Scrolling functions do not work properly if an Apple Mighty Mouse is used.	This cannot be fixed inside the program, Apple OS is controlling the mouse commands. If you experience scrolling problems, a "normal" USB mouse should be used instead.
14051	On some VST Instruments (VST2 Standard, e.g. Native Instruments), the wrong Preset name is displayed after a preset was changed. The sound actually changes correctly.	Please await Plugin Update.

13938	Offline Processing (e.g. Time stretch) may fail or crash if the processed files have extremely long filenames or names containing special characters.	Check the files you import for strange naming before Offline Processing.
13873	Mixer (Extended view) Title Bar is outside the screen. (Mac dual monitor Setups only)	Put Mixer in un-extended state and move it to a lower place on the screen and then extend it again.
13838	OMF created in Cubase 4 or Nuendo 4 cannot be loaded in Logic 7.1 or 7.2 (Logic crashes).	Use the OMF 1.0 export option. (Await Logic maintenance Update.)
13745	MIDI) Recording sometimes fails (abortion or freeze) when using MIDIMan (M-Audio) MIDISport 8x8 MIDI interface with the default Windows MIDI Driver.	You need to use the DirectMusic MIDI ports which are invisible by default. Please refer to the MIDI_Port_Filter_EN.pdf on the installation disk.
13507	Some Sound Presets of HALion ONE might take up more CPU than available and sound crackled.	Be careful with playing to many voices of certain sounds with long sustain phases and high amount of effects.
13324	MediaBay might encounter problems if System Hard Disks are being scanned.	Prefer scanning dedicated media disks.
13306	Plugin IK Multimedia Amplitube version 1 causes crash.	Use version 2 of IK Multimedia Amplitube.
13276	if MIDI track inside (closed) folder track is unfreezed, that MIDI track will still be frozen and nothing can be done to fix the state.	Repeat un-freeze with the folder track in unfolded state.
13200	Some MP3 files may fail to play correctly in Project Context (Media Bay)	Prefer working with uncompressed audio files (WAV, AIFF)
13166	Cannot delete font sets	You can delete a font set by selecting it from the menu while holding down <strg>PC or <command/>Mac</strg>
12867	MediaBay doesn't automatically recognize if files have been altered, moved, added or deleted in the finder. (Mac only)	Manually force a re-scan.
12790	Exporting as wave file creates stereo wave files with ".dts" extension instead of ".wav"	After export, manually rename the files to ".wav". <u>PC:</u> if file extensions are not visible (hidden) on your system, localize exported file and right-click it to open context menu. Select "Properties" now replace ".dts" with ".wav" and click "ok" . <u>MAC:</u> localize exported file and ctrl+click on it. Select "Get Info" and change the file extension ".dts" to ".wav". Press enter and confirm with "Use .wav".
12715	MediaBay: Sometimes, files with customized attributes (attributes created by the user), can not be found by the Detail Search.	The tagged files should at least once have been selected and viewed in the Tag Editor in "all (attributes)" mode.
12690	MediaBay: REX files can not be previewed in project context.	Unfortunately REX files don't allow playing in context.
12163	Amp Simulator plugin sums stereo signal to mono.	This is normal, it's a mono amp.
11811	If audio tracks are linked, engaging REC might not cause all tracks to record.	Check the preference "Enable Record on Selected Track".
11795	On certain systems with Intel Hyper Threading technology Nuendo 4 might freeze under heavy load.	Please deactivate Hyper Threading.
11606	Incompatibility with presets of older version of BFD plugin.	Make sure to use the current version of BFD plugins.
11600	Switching the ASIO / Core Audio buffer size can cause a system freeze when certain plugins (e.g. Waves RVox) when the plugins are active but in Bypass mode.	It's recommended to set the ASIO buffer size with no project loaded.
11543	REX2 files cannot be copied from MediaBay into the project.	Use the function "reveal in finder (explorer)" and drag the audio file from there into the project.
11439	Sound Designer II files get corrupted when used with the Network Collaboration feature.	Convert any SD II file to WAV or AIFF.
11430	Studio Manager MIDI ports will not be recalled correctly when loading a Cubase SX or Nuendo 3.x project into Nuendo 4.	You need to assign the proper MIDI ports manually again in the Studio Manager.
11407	Copy / pasting parts between folder-parts doesn't always work right. Pasted parts are not aligned correctly.	When copy / paste of complex part arrangements is required, try to avoid pasting into existing folder parts.

11381	BFD plugins: Sounds may be cut when Freezing Instruments channels.	If possible, use small ASIO buffer sizes before freezing BFD plugins channels.
11377	If Media Bay window is in "always on top" mode, commands executed in the project window (e.g. "delete") will affect selected files in the Media Bay browser.	To avoid this danger, don't set Media Bay window to "always on top".
11279	Incompatibility with projects created in Cubase SX 1.x. Plugin settings are not restored correctly.	You have to manually reload and adjust the plugins in Nuendo 4.
11274	Arpache SX doesn't sound smooth when ASIO buffer size is very large.	Reduce ASIO buffer size.
11186	Possible VST System Link synchronisation problem when the same port is used for both audio and VST System Link.	Run VST System Link through dedicated audio (separate from audio) port if this occurs.
11121	VST Connection Presets don't restore ASIO ports correctly if "not connected" ports are involved.	Either assign the VST connection busses to existing ports, or remove unused busses.
11073	9 Pin machine control does not work using the RS422 port of Blackmagic Decklink video cards (Windows only).	Use the built-in RS232 port using a RS232 / RS422 adapter. For accurate synchronisation a dedicated Machine Control / Sync device such as the Steinberg Sync Station is recommended.
11065	Retrospective Record: If a single Midi Input Port is selected, events from all parts are still stored.	Make sure the unselected MIDI Ports to not play unintended data.
10836	Generating Video Cache file doesn't work if the Video Player method was changed during a project.	Delete the Video Cache file manually and try again.
10823	Events can get slightly dislocated (few samples) after Pitch Shift with MPEX algorithm.	Use another algorithm if processed range is timing-critical.
10799	[Mac only] Performance / Playback problem due to sample rate mismatch between Nuendo and the audio card.	If your audio interface is clocked externally (e.g. via Word Clock), Nuendo might not take notice of sample rate changes (e.g. from 48 KHz to 44.1 KHz), which will disturb the audio playback. Make sure the sample rate is properly set in the Project Setup.
10772	Some audio files cannot be found when importing Open TL - file.	If you want OpenTL file to be used in Nuendo later on, make sure not to choose a directory path in the Media Destination field when you export the file.
10767	Some plugins based on UVIEngine are not synchronic when used with Nuendo	Wait an update of these plugins.
10728	Available Record Time isn't re-calculated correctly when tracks have been assigned to another Record Folder on another disk.	Rec disable / enable to update display
10660	Some sounds of the Prologue synth may sound slightly different on Mac (Intel) and PPC computers.	When porting projects using the between Mac (Intel) and PPC computers you might need to have to readjust some synth settings.
